QUALIFICATIONS

・Fluent in C and Python, and working knowledge of Java. I also have experience with front-side languages such as HTML and CSS.
・Capable of analyzing problems and exploring the right approach to them.
・Able to enjoy my work without forgetting to thank and respect everyone.
・Experience of writing a simple OS(UNIX), web application or embedded pipeline processor and so on. I was awarded the Idea Award in my class for that achievements.
・Experience in Scrum and Agile development as a developer.
・Experience in constructing image classification model using simple MLP and CNN.

SOCIAL EXPERIENCE

2019 Summer

teamLab Summer Internship   2 weeks
   Development of search system for a certain application
   ・Developed search system for a certain application and fixed some bugs.
   ・Proposed to realize high-speed and high-precision search easily using NoSQL(Solr).
   ・Agile development using tickets.
   ・Created a demo application and deployed it to the company's local network using Docker and AWS.

IBM Internship 2020 (IT Specialist course)   1 week
   Competition-type team development for a certain assumed request from another company
   ・Investigate customers, propose technical solutions, develop a application to realize the solutions, and make a presentation in a team of six. This was based on the idea of Scrum development.
   ・As a developer, I proposed app features, implemented UI and features, and presented.
   ・We finally developed a personality diagnostic app using IBM Watson.
   ・I talked a lot with all the team members and got along.
   ・I was awarded the MVP in this internship because of the personality of the mood maker.
